

Tobías Gatti

Software Engineer | Product-Focused Full-Stack & Applied AI

Bahía Blanca, Argentina | tobiasgatti02@gmail.com | +54 9 291 644 6463

LinkedIn | GitHub | tobiasgatti.com

SUMMARY

Software Engineer with approximately three years of full-stack experience, combining customer discovery, design collaboration, applied AI, rapid prototyping, and production ownership to solve real user problems.

CORE SKILLS

Product focus: Product discovery, technical scoping, rapid prototyping, customer support

Full stack: Next.js, React, TypeScript, Node.js, PostgreSQL, REST APIs, production deployment

Applied AI and delivery: LLM integration, agentic workflows, AI automation, observability, Docker, AWS

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | Firmaway (Startup) Nov 2024 - Present

- Own Balancito, an AI-powered accounting product, from customer problems and technical design through production delivery and iteration.
- Work daily with Product and Design to scope solutions, prototype features, and ship end-to-end functionality in every Scrum cycle.
- Support customers directly and turn recurring production pain points into product improvements and engineering priorities.
- Build AI automations that reduce operational overhead; introduced observability practices that reduced production incidents by 25%.

Freelance Full-Stack Developer | Educational Platform Jan 2024 - Jul 2024

- Owned the complete lifecycle of an educational platform from requirements and architecture to implementation and cloud deployment.
- Delivered authentication, content-management, and student progress workflows using Next.js, Node.js, and PostgreSQL.
- Shipped a responsive production application with 95+ Lighthouse performance scores.

SELECTED PROJECTS

F4brica.app - Product Discovery | Stakeholder research, feedback synthesis, product design

- Contribute to ongoing discovery with 20+ stakeholder interviews, synthesizing direct feedback to define user problems, validate hypotheses, and prioritize product and design decisions.

Tolio - Shared Economy Marketplace | Next.js, TypeScript, Node.js, PostgreSQL, Stripe, React Native

- Architected and built a peer-to-peer marketplace with identity verification, real-time WebSockets, payments, matching, and reputation systems. Production: tolio.app.

Formula 1 Telemetry Analysis | Python, NumPy, Pandas, React

- Built a telemetry application to analyze driver performance, track conditions, lap behavior, and race-impacting physical factors.

EDUCATION AND LANGUAGES

Machine Learning Economics Specialization, Universität Graz, Austria, 2026 (Completed) | **B.Sc. in Software Engineering**, Universidad Nacional del Sur, Argentina, 2025 (Completed) | **First Certificate in English (B2)**, Cambridge, 2019 (Completed)

Languages: Spanish (Native) | English (B2+ Professional) | German (B1)
